## TechArena Poland 2025 Code Submission Guide

This document provides a user guide on how to make code submissions on the agorize platform. From the event page you can click on view your participation link

Which will allow you to edit the registration form. In this form you can upload your submission as a zip file . Please refer to the problem description for the expected format of the submission.

Once a submission is uploaded, it will be sent for evaluation. It is not necessary to click on the submit button.

To see feedback from the scoring system, open your admin chat (button at the top right)

Where you will see messages with the score or scoring errors from the evaluation system.

Your competition ranking can be seen in the “Leaderboard” tab.

## Asking questions

You can ask questions on the following channels:
- admin chat, the same chat where you get the scoring feedback. These messages are private and only event admins can see them

- the discussion tab, allows to posting public messages and comments that will be seen by all participants.

## Evaluation environment

- please make sure to use Python and torch versions indicated in the problem description for your trained model
- only 1 CPU core is used for inference. Multithreading will disabled in torch when your submission is running.
